

J.B. INSTITUTE OF ENGINEERING & TECHNOLOGY

(AUTONOMOUS)

ACADEMIC YEAR

2015-2016

COURSE PLAN

2015-16

Regulation: R12

FACULTY DETAILS:

Name of the Faculty:: B.VIJAY KUMAR
Designation: Assistant professor
Department:: INFORMATION TECHNOLOGY

COURSE DETAILS

Name Of The Programme:: B.Tech Batch:: 2012
Designation:: III-B.Tech
Year 2015-16 Semester II
Department:: INFORMATION TECHNOLOGY
Title of The Subject Linux Programming Subject Code 6755050
No of Students 47

| | | |
|---|--------------------|-----------------|
|  | COURSE PLAN | 2015-16 |
| | | Regulation: R12 |

FACULTY DETAILS:

Name of the Faculty:: B.VIJAY KUMAR
 Designation: Assistant Professor
 Department:: INFORMATION TECHNOLOGY

1. TARGET

- a) Percentage Pass 100%
- b) Percentage I class 95%

2. COURSE PLAN

(Please write how you intend to cover the contents: i.e., coverage of Units by lectures, guest lectures, design exercises, solving numerical problems, demonstration of models, model preparation, or by assignments, etc.)

- a) Coverage of units by lectures
- b) Design exercises
- c) Assignments

3. METHOD OF EVALUATION

- 3.1. Continuous Assessment Examinations (CAE 1, CAE 2)
- 3.2. Assignments / Seminars
- 3.3. Mini Projects
- 3.4. Quiz
- 3.5. Term End Examination
- 3.6. Others

4. List out any new topic(s) or any innovation you would like to introduce in teaching the subject in this Semester.

GUIDELINES TO STUDY THE SUBJECT

2015-16

Regulation: R12

FACULTY DETAILS:

Name of the Faculty::

B.VIJAY KUMAR

Designation:

Assistant Professor

Department::

INFORMATION TECHNOLOGY

Guidelines for Preparing the Course:

Course Description:

This programming course covers the major methods of inter process communications (IPC), which is the basis of all client / server applications under UNIX, Linux utilities. There will be extensive Programming exercises in shell scripts. It also emphasizes various concepts in IPC and multithreaded programming and socket programming.

Course Objectives:

1. To understand the usage of UNIX inter process communications (IPC).
2. To control the resources with various commands.
3. To understand File systems and File structures.
4. To provide support for distributed and networked applications in UNIX environment.
5. To understand the concepts of multithreaded programming and socket programming.
6. To study the detail concepts of low level file access
7. Can understand the client ,server programming
8. To know the basic concept of linux scripting

Learning Outcomes:

Upon completion of this course, students will be able to:

1. Mastery of the basic UNIX process structure and the UNIX file system.
2. Understand all the UNIX utilities, and implement shell scripting.
3. Mastery of simple UNIX filters
4. Familiarity of UNIX pipes and redirection, UNIX environment, traps, signals, filter parameters, filter options, UNIX contentions, and Regular Expressions.
5. Mastery of at least one Shell scripting language.
6. Understand the concepts of process, threads, and file structure.
7. Familiarity with Interprocess Communication using pipes, shared memory, semaphores and messages.
8. Design various client server applications using TCP or UDP protocols.

COURSE OBJECTIVES

2015-16

Regulation: R12

FACULTY DETAILS:

Name of the Faculty:: B.VIJAY KUMAR
Designation: Assistant Professor
Department:: INFORMATION TECHNOLOGY

On completion of this Subject / Course the student shall be able to:

| S.No. | Objectives | Outcomes |
|-------|--|----------|
| 1. | To understand File systems and File structures. | 1,2 |
| 2. | To control the resources with various commands | 3 |
| 3. | To understand bash concepts | 4,5 |
| 4. | To provide support for distributed and networked applications in UNIX environment. | 4 |
| 5. | To know the basic concept of linux scripting | 5 |
| 6. | Can know the concept of POSIX thread API | 6 |
| 7. | To study the detail concepts of low level file access | 6 |
| 8. | To understand the usage of UNIX inter process communications (IPC). | 7 |
| 9. | To understand the concepts of multithreaded programming and socket programming | 8 |
| 10. | Can understand the client ,server programming | 8 |

Signature of Faculty
Date:

Note: For each of the OBJECTIVE indicate the appropriate OUTCOMES to be achieved.
Kindly refer Page 16, to know the illustrative verbs that can be used to state the objectives.

COURSE OUTCOMES

2015-16

Regulation: R12

FACULTY DETAILS:

Name of the Faculty:: B.VIJAY KUMAR
 Designation: Assistant Professor
 Department:: INFORMATION TECHNOLOGY

The expected outcomes of the Course / Subject are:

| S.No. | General Categories of Outcomes | Specific Outcomes of the Course |
|-------|--|---------------------------------|
| A. | An ability to apply knowledge of mathematics, science, and engineering | |
| B. | An ability to design and conduct experiments, as well as to analyze and interpret data | |
| C. | An ability to design a system, component, or process to meet desired needs within realistic Constraints such as economic, environmental, social, political, ethical, health and safety, Manufacturability and sustainability | |
| D. | An ability to function on multi-disciplinary teams | |
| E. | An ability to identify, formulate, and solve engineering problems | |
| F. | An understanding of professional and ethical responsibility | |
| G. | An ability to communicate effectively | |
| H. | The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context | |
| I. | A recognition of the need for, and an ability to engage in life-long learning | |
| J. | A knowledge of contemporary issues | |
| K. | An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. | |

Objectives – Outcome Relationship Matrix (Indicate the relationships by ☒ mark).

| Outcomes Objectives | A | B | C | D | E | F | G | H | I | J | K |
|---------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| 1. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

TUTORIAL SHEETS - I

2015-16

Regulation: R12

FACULTY DETAILS:

Name of the Faculty:: B.VIJAY KUMAR
Designation: Assistant Professor
Department:: INFORMATION TECHNOLOGY
The Schedule for the whole Course / Subject is:: Linux programming

Date:

This Tutorial corresponds to Unit Nos.I,II

Time:

1. a) Explain the **grep** family of commands in detail with suitable examples?
b) What is **awk script**? Explain different **Patterns** in awk?
c) Write a **sed script** to print all the lines of a **file** that is passed as command line argument by changing the string **madras** with **chennai**?
2. a) What is **Shell script**? Explain **control structures** in shell?
b) Write a short note on **I/O Redirection** operators.
c) Write a shell script to display **files** which has read and write and execution permissions?

Objectivs: To control the resources with various commands.

Outcomes: Understand all the UNIX utilities, and implement shell scripting.

Please write the Questions / Problems / Exercises which you would like to give to the students and also mention the objectives to which these questions / Problems are related.

TUTORIAL SHEETS - II

2015-16

Regulation: R12

FACULTY DETAILS:

Name of the Faculty:: B.VIJAY KUMAR
Designation: Assistant Professor
Department:: INFORMATION TECHNOLOGY

The Schedule for the whole Course / Subject is:: Linux programming

Date:

This Tutorial corresponds to Unit Nos.III,IV,V

Time:

1. a) What is **File** ? Explain **File system structure** in Linux?
b) Differentiate the following terms?
i. **getc()** vs **fgetc()** ii. **stat()** vs **fstat()** iii. **printf()** vs **fprintf()** iv. **scanf()** vs **fscanf()**
2. a) what is **process** ? Explain kernel support for process?
b) What is **system call**? Differentiate the following system calls?
i. **fork()** and **vfork()** ii. **wait()** and **waitpid()**
- 3 a) Compare the IPC functionality provided by pipes and message queues. What are the advantages and drawbacks of each? Explain briefly?
b) Explain about UNIX system V APIs for Messages?
c) Write a program for creating a private message queue?

Objectives: 1.To control the resources with various commands.
2.To understand File systems and File structures.
3.To understand the usage of UNIX inter process communications (IPC)

Outcomes: 1. Understand the concepts of process, threads, and file structure.
2. Familiarity of UNIX pipes and redirection, UNIX environment, traps, signals, filter parameters, filter options, UNIX contentions, and Regular Expressions.
3.Understand the concepts of process, threads, and file structure.

Please write the Questions / Problems / Exercises which you would like to give to the students and also mention the objectives to which these questions / Problems are related.

TUTORIAL SHEETS - III

2015-16

Regulation: R12

FACULTY DETAILS:

Name of the Faculty:: B.VIJAY KUMAR
Designation: Assistant Professor
Department:: INFORMATION TECHNOLOGY

Date:

This Tutorial corresponds to Unit Nos. VI,VII,VIII

Time:

- 1) a) Explain similarities and dissimilarities between the semaphore and shared memory IPC mechanisms?
b) Explain the kernel data structure for shared memory with a neat diagram. Also explain the APIs associated for creating and destroying a shared memory?
c) Write a program to demonstrate communication of two different processes via shared memory?
- 2) a) Write a program to create a thread with pthread-create?
b) Explain the APIs used to specify the attributes for a thread?
c) What are the benefits of using multithreaded programming?
- 3) a) Explain the sequence of steps to process various socket functions using TCP protocol?
b) Explain about the structure of socket addresses?
c) Explain a stream socket with a illustrative example for client/server program?

Object: To understand the concepts of multithreaded programming and socket programming.

Outcomes: Familiarity with Inter process Communication using pipes, shared memory, semaphores and messages.

Design various client server applications using TCP or UDP protocols.

Please write the Questions / Problems / Exercises which you would like to give to the students and also mention the objectives to which these questions / Problems are related.

ILLUSTRATIVE VERBS FOR STATING INSTRUCTIONAL OBJECTIVES

2015-16

Regulation: R12

These verbs can also be used while framing questions for Continuous Assessment Examinations as well as for End – Semester (final) Examinations.

ILLUSTRATIVE VERBS FOR STATING GENERAL OBJECTIVES

Know

Comprehend

Understand

Apply

Analyze

Design

Generate

Evaluate

ILLUSTRATIVE VERBS FOR STATING SPECIFIC OBJECTIVES:

A. Cognitive Domain

| 1 | 2 | 3 | 4 | 5 | 6 |
|------------------|--|---|--|--|--------------------------------|
| Knowledge | Comprehension Understanding | Application of knowledge & comprehension | Analysis of whole w.r.t. its constituents | Synthesis combination of ideas/constituents | Evaluation judgement |

| | | | | | |
|-----------|---------------------------|-------------|---------------|-------------|-----------|
| Define | Convert | Change | Breakdown | Categorize | Appraise |
| Identify | Defend | Compute | Differentiate | Combine | Compare |
| Label | Describe (a procedure) | Demonstrate | Discriminate | Compile | Conclude |
| List | Distinguish | Deduce | Distinguish | Compose | Contrast |
| Match | Estimate | Modify | Separate | Create | Criticize |
| Reproduce | Explain why/how | Predict | Subdivide | Devise | Justify |
| Select | Extend | Prepare | | Design | Interpret |
| State | Generalize | Relate | | Generate | Support |
| | Give examples | Show | | Organize | |
| | Illustrate | Solve | | Plan | |
| | Infer | | | Rearrange | |
| | Summarize | | | Reconstruct | |
| | | | | Reorganize | |
| | | | | Revise | |

B. Affective Domain

Adhere

| | | |
|---|-------------------------------------|-----------------|
|  | LESSON PLAN Unit-1 | 2015-16 |
| | | Regulation: R12 |

Name of the Faculty: B.VIJAY KUMAR
Subject: Linux Programming
Unit I
INSTRUCTIONAL OBJECTIVES: 12
Subject Code: 6755050

| Session No | Topics to be covered | Time | Ref | Teaching Method |
|------------|--|--------|-----|-----------------|
| 1 | File handling utilities, Security by file permissions, | 50min | T1 | Black Board |
| 2 | Process utilities, Disk utilities | 50min | T1 | Black Board |
| 3,4 | Networking commands, Filters | 100min | T1 | Black Board |
| 5 | Text processing utilities, Backup utilities | 50min | T1 | Black Board |
| 6,7 | Sed: Scripts, Operation, Addresses | 100min | T1 | Black Board |
| 8 | Commands, Applications | 50min | T1 | Black Board |
| 9 | Awk: Execution, fields and records , | 50min | T1 | Black Board |
| 10 | Scripts, operation, patterns, | 50min | T1 | Black Board |
| 11,12 | Actions, Functions, using system commands in awk | 100min | T1 | Black Board |

On completion of this lesson the student shall be able to(Outcomes)

1. Understand different file handling utilities and text processing utilities
2. Know how to write and execute sed and awk programs easily

| | | |
|---|------------------------------------|-----------------|
|  | ASSIGNMENT Unit-I | 2015-16 |
| | | Regulation: R12 |

Assignment / Questions

1. Write a linux command to display the lines from 25 to 45 of /etc/passwd file.
Write a linux command to display the directories in /etc 4
2. Consider that marks.txt is a file that contains one record per line (comma separated fields) of the student data in the form of studentid, student name, Telugu marks, English marks, Maths marks, Science marks, Social marks. Write an awk script to generate result for every student in the form of studentid, student name, Total marks and result. Result is PASS if marks is ≥ 30 in Telugu and English, and if marks ≥ 40 in other subjects. Result is FAIL otherwise.
3. Write briefly on sed, chmod, df, comm, fgrep and sort commands with examples.

Based upon the assignment student should be able to understand programming concept of sed scripts and also know the usage of chmod, df comm, and fgrep commands

Signature of Faculty

Note: Mention for each question the relevant objectives and outcomes.

LESSON PLAN
Unit-II

2015-16

Regulation: R12

Name of the Faculty: B.VIJAY KUMAR

Subject Linux Programming

Subject Code 6755050

Unit II

INSTRUCTIONAL OBJECTIVES: 9

| Session No | Topics to be covered | Time | Ref | Teaching Method |
|------------|---|--------|-----|-----------------|
| 13 | Introduction: shell responsibilities, pipes | 50min | T1 | Black Board |
| 15 | input Redirection, output redirection | 50min | T1 | Black Board |
| 15 | here documents, running a shell script | 50min | T1 | PPT |
| 16 | the shell as a programming language, shell meta characters | 50min | T1 | Black Board |
| 17 | file name substitution, shell variables command substitution | 50min | T1 | Black Board |
| 18 | shell commands, the environment quoting, test command | 50min | T1 | PPT |
| 19,20 | control structures, arithmetic in shell shell script examples | 100min | T1 | PPT |
| 21 | interrupt processing, functions | 50min | T1 | Black Board |

On completion of this lesson the student shall be able to

Write and execute shell programs effectively.

| | | |
|---|-------------------------------------|-----------------|
|  | ASSIGNMENT Unit-II | 2015-16 |
| | | Regulation: R12 |

Assignment / Questions

1. Write briefly on case control structure in bash with examples. Write briefly on “||” operator in bash.
2. Write in detail on the features of test command.
3. Write in detail on the command expansion feature provided in bash with examples

Objective and outcome of the assignment is should able to understood bash concept in UNIX

Signature of Faculty

Note: Mention for each question the relevant objectives and outcomes.

| | | |
|---|---------------------------------------|-----------------|
|  | LESSON PLAN Unit-III | 2015-16 |
| | | Regulation: R12 |

Name of the Faculty: B.VIJAY KUMAR

Subject Linux Programming

Subject Code 6755050

Unit III

INSTRUCTIONAL OBJECTIVES: 10

| Session No | Topics to be covered | Time | Ref | Teaching Method |
|------------|---|-------|--------|-----------------|
| 22 | File Concept, File System structure, Inodes, File types | 50min | T1,RB1 | Black Board |
| 23 | The standard I/O (fopen, fclose, fflush, fseek, fgetc, getc, getchar, fputc, putc, putchar, fgets, gets etc.) | 50min | T1 | Black Board |
| 24 | formatted I/O, stream errors, kernel support for files | 50min | T1 | PPT |
| 25 | System calls library functions, file descriptors | 50min | T1 | Black Board |
| 26 | low level file access : usage of open, creat, read, write, close, lseek, stat family | 50min | T1,RB1 | Black Board |
| 27 | umask, dup, dup2, fcntl, file and record locking | 50min | T1 | PPT |
| 28 | file and directory management: chmod, chown, links(soft links & hard links - unlink, link, symlink) | 50min | T1,RB1 | Black Board |
| 29 | mkdir, rmdir, chdir, getcwd | 50min | T1,RB1 | Black Board |
| 30 | Scanning Directories: opendir, readdir Closedir | 50min | T1,RB1 | Black Board |
| 31 | rewinddir, seekdir, telldir functions | 50min | T1,RB1 | Black Board |

On completion of this lesson the student shall be able to(Outcomes)

1. access low level files efficiently
2. manage directories and files in file system

1.

| | | |
|---|--------------------------------------|-----------------|
|  | ASSIGNMENT Unit-III | 2015-16 |
| | | Regulation: R12 |

Assignment / Questions

1. Write a sed script to print all the lines of a **file** that is passed as command line argument by changing the string madras with Chennai
2. Write in detail with examples on the commands **chown, fgrep, ps and tar**.
3. Write an awk program to print the fields 1 and 4 of a file. That is passed as a command line argument. The file contains lines of information that is separated by “,” as delimiter. The awk program must print at the end the sum of all 4th field data.

The main outcome of the assignment is that student can able to write and execute file programs their own.

Signature of Faculty

Note: Mention for each question the relevant objectives and outcomes.

| | | |
|---|--------------------------------------|-----------------|
|  | LESSON PLAN Unit-IV | 2015-16 |
| | | Regulation: R12 |

Name of the Faculty: B.VIJAY KUMAR

Subject Linux Programming

Subject Code 6755050

Unit IV

INSTRUCTIONAL OBJECTIVES: 9

| Session No | Topics to be covered | Time | Ref | Teaching Method |
|------------|--|--------|--------|-----------------|
| 32 | Process concept | 50min | T1,RB1 | Black Board |
| 33 | Kernel support for process | 50min | T1,RB1 | Black Board |
| 34 | process attributes, process hierarchy | 50min | T1,RB1 | PPT |
| 35 | process states,process composition | 50min | T1,RB1 | Black Board |
| 36 | process control : process creation | 50min | T1 | Black Board |
| 37 | waiting for a process,process termination | 50min | T1 | PPT |
| 38 | zombie process,orphan process | 50min | T1,RB1 | Black Board |
| 39,40 | system call interface for process management-fork vfork, exit, | 100min | T1,RB1 | Black Board |

On completion of this lesson the student shall be able to (Outcomes)

1. Understand the concepts of process, threads, and file structure.
2. Mastery of the basic UNIX process structure and the UNIX file system.

| | | |
|---|-------------------------------|-----------------|
|  | ASSIGNMENT Unit-IV | 2015-16 |
| | | Regulation: R12 |

Assignment / Questions

1. Develop an awk program to summarize from the list of all processes, a count of processes run by every user (including root)?
2. Differentiate between zombie and orphan processes?
3. Explain about process attributes?

The main object of the assignment is to know the different processes in file system
And the main outcome of the assignment is that student can able to understand different processes in file system.

Signature of Faculty

Note: Mention for each question the relevant objectives and outcomes.

| | | |
|---|-------------------------------------|-----------------|
|  | LESSON PLAN Unit-V | 2015-16 |
| | | Regulation: R12 |

Name of the Faculty: B.VIJAY KUMAR

Subject Linux Programming

Subject Code 6755050

Unit V

INSTRUCTIONAL OBJECTIVES: 9

| Session No | Topics to be covered | Time | Ref | Teaching Method |
|------------|--------------------------------|--------|-----|-----------------|
| 41 | Introduction to signals | 50min | T2 | Black Board |
| 42 | Signal generation and handling | 50min | T2 | Black Board |
| 43 | Kernel support for signals | 50min | T2 | PPT |
| 44 | Signal function | 50min | T2 | Black Board |
| 45 | unreliable signals | 50min | T2 | Black Board |
| 46 | reliable signals | 50min | T2 | PPT |
| 47 | kill, raise , alarm | 50min | T2 | Black Board |
| 48,49 | pause, abort, sleep functions | 100min | T2 | Black Board |

On completion of this lesson the student shall be able to(Outcomes)

1. Know the differences of reliable and unreliable signals
2. Can understood signal generation and handling concept

| | | |
|---|------------------------------------|-----------------|
|  | ASSIGNMENT Unit-V | 2015-16 |
| | | Regulation: R12 |

Assignment / Questions

1. Explain about kernel support for signals?
2. Differentiate kill and abort , sleep and rise factions?
3. Explain about different types of signals
4. What are reliable signals? Explain about the primary features of reliable functions illustrate an example program for handling for handling reliable signals?

The main objective of the assignment is should be able to understood the signal concept

Signature of Faculty

Note: Mention for each question the relevant objectives and outcomes.

LESSON PLAN Unit-VI

2015-16

Regulation: R12

Name of the Faculty: B.VIJAY KUMAR

Subject: Linux Programming

Subject Code: 6755050

Unit VI

INSTRUCTIONAL OBJECTIVES: 11

| Session No | Topics to be covered | Time | Ref | Teaching Method |
|------------|---|--------|-----|-----------------|
| 50 | Introduction to IPC, IPC between processes on a single computer system | 50min | T3 | Black Board |
| 51 | IPC between processes on different systems, | 50min | T3 | Black Board |
| 52,53 | Pipes and FIFOs | 100min | T3 | PPT |
| 54 | Introduction to three types of IPC(Linux) -message queues, semaphores and shared memory. | 50min | T3 | Black Board |
| 55,56 | Message Queues - Kernel support for messages | 100min | T3 | Black Board |
| 57 | Linux APIs for messages, client/server example. | 50min | T3 | PPT |
| 58 | Semaphores : Kernel support for semaphores | 50min | T3 | Black Board |
| 59 | Linux APIs for semaphores, | 50min | T3 | Black Board |
| 60 | file locking with semaphores. | 50min | T3 | Black Board |

On completion of this lesson the student shall be able to (Outcomes)

1. Mastery of the basic UNIX process structure and the UNIX file system.
2. Familiarity with Interprocess Communication using pipes, shared memory, semaphores and messages.

| | | |
|---|-------------------------------------|-----------------|
|  | ASSIGNMENT Unit-VI | 2015-16 |
| | | Regulation: R12 |

Assignment / Questions

1. Briefly explain about inter process communication?
2. Briefly explain about semaphores, shared memory and message queues?

The main outcome of the assignment: Student can understand the concept of IPC

Signature of Faculty

Note: Mention for each question the relevant objectives and outcomes.

| | | |
|---|---------------------------------------|-----------------|
|  | LESSON PLAN Unit-VII | 2015-16 |
| | | Regulation: R12 |

Name of the Faculty: B.VIJAY KUMAR

Subject Linux Programming

Subject Code 6755050

Unit VII

INSTRUCTIONAL OBJECTIVES: 9

| Session No | Topics to be covered | Time | Ref | Teaching Method |
|------------|---|--------|--------|-----------------|
| 61 | Differences between threads and processes | 50min | T3 | Black Board |
| 62 | Thread structure and uses | 50min | T3,RB2 | Black Board |
| 63 | Threads and Lightweight Processes | 50min | T3 | PPT |
| 64,65 | POSIX Thread APIs | 100min | T3,RB2 | Black Board |
| 66 | Creating Threads | 50min | T3 | Black Board |
| 67 | Thread Attributes | 50min | T3 | PPT |
| 68 | Thread Synchronization with semaphores | 50min | T3,RB2 | Black Board |
| 69 | Thread Synchronization with Mutexes | 50min | T3,RB2 | Black Board |

On completion of this lesson the student shall be able to
Understand the multithread programming

| | | |
|---|--------------------------------------|-----------------|
|  | ASSIGNMENT Unit-VII | 2015-16 |
| | | Regulation: R12 |

Assignment / Questions

1. Differentiate between threads and processes
2. Explain about POSIX thread API's
3. Briefly explain about thread synchronization with semaphores and mutex

Outcome of the assignment :Students can able to understand the concepts of process, threads, and file structure.

Signature of Faculty

Note: Mention for each question the relevant objectives and outcomes.

| | | |
|---|--|-----------------|
|  | LESSON PLAN Unit-VIII | 2015-16 |
| | | Regulation: R12 |

Name of the Faculty: B.VIJAY KUMAR

Subject Linux Programming

Subject Code 6755050

Unit VIII

INSTRUCTIONAL OBJECTIVES: 7

| Session No | Topics to be covered | Time | Ref | Teaching Method |
|------------|--|--------|--------|-----------------|
| 70 | Introduction to Linux Sockets | 50min | T3,RB2 | Black Board |
| 71,72 | Socket system calls for connection oriented protocol | 100min | T3RB2 | Black Board |
| 73,74 | Socket system calls for connectionless protocol | 100min | T3RB2 | PPT |
| 75,76 | example-client/server programs | 100min | T3,RB2 | Black Board |

On completion of this lesson the student shall be able to

.Design various client server applications using TCP or UDP protocols.

**ASSIGNMENT
Unit-VIII**

2015-16

Regulation: R12

Assignment / Questions

1. Explain about client server programming
2. Explain about connection oriented and connection less protocol
3. Briefly explain about socket system calls

Outcome of the assignment: student can able to understand the client ,server programming and socket system calls

Signature of Faculty

Note: Mention for each question the relevant objectives and outcomes.
