

# **J.B. INSTITUTE OF ENGINEERING AND TECHNOLOGY**

(UGC AUTONOMOUS)

Bhaskar Nagar, Yenkapally Village, Moinabad Mandal, R.R. District, Hyderabad -500075

**DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING**

**FIVE-WORKSHOP**

*On*

**PRINTED CIRCUIT BOARD DESIGN (PCB-DESIGN)**

---

***25-10-2024 TO 29-10-2024***

**Convenor:**

**Dr. Anindya Jana**  
Professor ECE

**HOD-ECE:**

**Dr. Towheed Sultana**  
Professor ECE

## CIRCULAR

---

Date: 06-09-2024

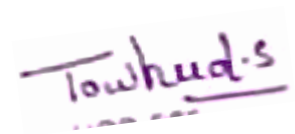

This is to inform all II Year-I Semester Students, Department of ECE IETE student chapter is organizing Five-Day Workshop On Hands on “PCB Design” 25th -29th Oct, 2024. Details of the event is provided in the broacher.

For registrations contact Coordinators  
Mr. Rajkumar D Bhure

Copy to  
1 Principal  
2. HODs CSE, ECM, EEE  
3. Class -in charges

**Coordinators**

**HOD, ECE**

**REGISTER  
NOW**

# PCB WORKSHOP

**DATE**  
25th OCT  
ONWARDS

**VENUE**  
EDC LAB

**REGISTRATION FEE**  
**Rs750/TEAM**  
**(3 PEOPLE PER TEAM)**

**TIME**  
10 AM-3:30PM

**CLIQUE**

## **DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING**

**FIVE-DAY WORKSHOP (25-10-2024 to 29-10-2024)**

**On  
“PCB WORKSHOP”**

### **Vision of Institute:**

To be a center of excellence in Engineering education, research and application of knowledge to benefit society with ethical values.

### **Mission of Institute:**

- To provide world class engineering education, encourage research and Development.
- To evolve innovative applications of technology and develop entrepreneurship.
- To mould the students into socially responsible and capable leaders.

### **Vision of ECE Department:**

To be a guiding force enabling multifarious applications in Electronics and Communications Engineering, promote innovative research in the latest technologies to meet societal needs

### **Mission of ECE Department:**

- To provide and strengthen core competencies among the students through expert training and industry interaction.
- To promote advanced designing and modelling skills to sustain technical development and lifelong learning in ECE.
- To promote social responsibility and ethical values, within and outside the department.

### **About the Department:**

The Department of ECE is best known for its talented and dedicated professionals renowned for their excellence in various specializations in the field of Electronics & Communication Engineering. For the last ten years, the students of ECE, who walked out of the portals of the institute successfully, holding their degrees, were immediately inducted into the MNCs of high reputation in India & abroad. The intake of B. Tech Program is 120 and MTech program in VLSI System Design is 18. Department of ECE is having professional societies like IEEE, Department clubs etc.

## **About the Workshop:**

A PCB (printed circuit board) workshop is a hands-on training session that focuses on teaching participants how to design, fabricate, and assemble their own printed circuit boards. These workshops can be tailored to different skill levels, from beginner to advanced, and may cover a variety of topics such as:

- Introduction to PCB designing
- PCB layout and design rules
- Schematic capture and symbol creation
- Component placement and routing
- Soldering and assembly techniques

Participants in a PCB workshop typically work in small groups, with each group designing and fabricating their own PCB. This provides an opportunity for participants to collaborate and learn from each other, as well as to troubleshoot any issues that arise during the design and fabrication process. Overall, a PCB workshop can be a valuable learning experience in electronics field.

## **Course Goals:**

Understanding the basics of PCB design, participants should gain a fundamental understanding of PCB design principles, including schematic capture, component placement and routing.

- Design and fabrication of a functional PCB: By the end of the workshop, participants should have designed and fabricated a functional PCB that meets the specifications provided.
- Soldering skills: Depending on the focus of the workshop, participants may also gain practical skills in soldering and component assembly.

By achieving these goals, participants should leave the workshop with a solid foundation in PCB design and manufacturing, as well as practical skills that can be applied to future projects.

# Report on Four-Day Workshop On “PCB WORKSHOP”

Five-Day Workshop on “PCB” was conducted by the Department of Electronics and Communication Engineering from 25<sup>th</sup> to 29<sup>th</sup> October 2024. Mr.VVVS Prasad was the Resource Person. Six Sessions were conducted both theory and practical. The topics covered were Introduction on PCB, Its uses and applications. Resource person Enlighted the students about the scope and opportunities in this field. A quiz was conducted in the last session and feedback was collected. The workshop was concluded with vote of thanks.

## **Workshop Structure and Execution:**

### **Day-1:**

#### **Circuit Design and Implementation:**

- The circuit diagrams are designed using with components and connections planned as per the schematic, followed by design verification to ensure accuracy, and the finalized layout is prepared for PCB fabrication.

#### **Schematic Drawing for Component Layout:**

- The schematic, based on the dimensions of the components, is drawn on a graph sheet for better clarity and easy understanding.

#### **Transferring the Design to Copper Clad Board:**

- The schematic is drawn on a copper clad by placing a carbon sheet on copper clad as per the diagram on the graph sheet.
- The copper clad is painted with white paint or covered by a sticker, as per the diagram.

### Etching process:

- The copper clad is Etched by a ferric Chloride solution.
- Required quantity of Ferric Chloride is taken in a Tub . Sufficient quantity of water is added to it and stirred well till all the granules are dissolved.
- The painted copper clad after drying is placed in the tub containing  $\text{FeCl}_3$ .
- Care to be taken to use gloves on the hand and use goggles to cover eyes while Etching.

### Day-2:

#### Testing and Troubleshooting:

- Checking for continuity and short circuits.
- Testing with a multimeter and power supply, and debugging and fixing errors are essential steps in troubleshooting electrical systems.

#### Drilling the Holes

- Holes are made by PCB drilling machine at the appropriate points Where discontinuity is there.

### **Soldering the Components**

- Components are placed on the PCB circuit board and soldered with a soldering Iron.

### **Final Finishing and Assembly**

- The extra leads are cut in order to see that there is no short circuit . The circuit is tested for satisfactory working.

## Engaging speeches:

Speech by .Dr. Towheed Sultana

Speech by Mr.Raj Kumar D Bhure

Speech by Dr.Anindya Jana

Speech by Mr.VVVS Prasad

## PHOTOS: BATCH-1

**Workshop Explanation by  
Mrs. A.Jyothi Mam**

**Instructors addressing students**

## PHOTOS: BATCH-2

**Workshop Explanation by Mrs. Supriya**

**Project explanation by Resource person**

### Resource person: Mr. VVVS Prasad

- The resource person was knowledgeable about this subject
- The resource person managed student's participation well
- The resource person concepts well.
- The resource person encouraged questions and was responsive.
- The resource person feedback and clarification during practice sessions.
- The resource person my overall experience a positive one.
- The resource person advised me of the next class(es) that I should take.
- The resource person recommended the self-paced offering that Compliments this class.
- The resource person gave ideas for further Mini/ Major Projects

## PARTICIPANTS LIST: BATCH-1
